SUMMARY

Frontend Software Engineer with 3 years of experience building React JS, Next.js, Node JS, and applications for US enterprise and government clients, including BuzzClan's flagship records platform serving 130+ public agencies and a City of Long Beach admin portal. Specializes in multi-tenant SaaS UI, LLM workflow integration, and agentic coding with Claude Code, having shipped 20+ production modules across government, healthcare staffing, and proposal management. BBA background brings business judgment that managers value when translating client needs into clean engineering.

PROFESSIONAL EXPERIENCE

Associate, Software Development · BuzzClan Inc.

Feb 2024 – Apr 2026

Frontend developer on BuzzClan's flagship products and US client engagements, working across multi-tenant SaaS platforms in government, healthcare staffing, and proposal management.

- Shipped React modules for Document Classification, State Rules, and Deep Scanning in DMMS, BuzzClan's records platform for 130+ public agencies, cutting feature delivery time by 30% via shared multi-tenant patterns.
- Built an admin portal for the City of Long Beach to monitor ticketing services and mobile app logs, running weekly client demos and shipping 15+ reusable RTK Query components that cut page loads by 20%.
- Built the Award Onboarding module for BuzzRFP, BuzzClan's multi-tenant CRM, integrating Google Drive, Online APIs to automate document and revenue workflows, removing 20+ weekly manual hours.
- Shipped 4 modules for Volticare, a healthcare staffing platform, including NPI search and geolocation-based provider filtration, improving recruiter search-to-match time by 35% in production.
- Built reusable React patterns for LLM workflows (prompt templates, streaming responses, async job queues), adopted across DMMS and BuzzRFP, and cutting AI feature ship time by 50%.
- Reduced critical production issue resolution time by 50% across DMMS and BuzzRFP via structured Chrome DevTools profiling, network log analysis, and reproducible bug reports adopted team-wide.

Freelance Frontend Developer · Self-Employed

Feb 2023 – Jan 2024

Combined freelance frontend work for small Indian business clients with personal investment portfolio management and self-directed React learning between full-time engineering roles.

- Delivered 3 freelance React projects for small Indian business clients in coaching and real estate, shipping landing pages, and admin dashboards within 2 to 3 week cycles at 100% on-time delivery.
- Managed a personal equity and mutual fund portfolio of 12+ holdings, applying BBA-trained business analysis to research positions and tracking returns through a custom React dashboard built end-to-end.
- Completed self-directed React, Node, TypeScript, and Next.js learning through structured coursework and 6+ practice projects, building a pattern library that fed directly into production work at BuzzClan.

Frontend Developer · TNC Inc.

Aug 2022 – Jan 2023

Frontend developer on small project teams building React POCs and production web tools for B2B industrial-consulting clients across automotive and manufacturing engagements.

- Built client POCs in React and JavaScript, translating business requirements into functional prototypes that secured project approvals from 3 enterprise clients across automotive and industrial verticals.
- Developed responsive UI components in HTML5, CSS3, and Bootstrap, delivering pixel-accurate layouts across desktop and mobile breakpoints and reducing post-handoff design revisions by 40%.

TECHNICAL SKILLS

Languages & Type Systems: JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS

Frameworks & Libraries: React, Node, Next.js, Redux, RTK Query, React Hook Form, Tailwind CSS, Material UI

AI & LLM Integration: Claude Code, Anthropic API, OpenAI API, Prompt Engineering, Streaming Responses, AI Agents

APIs & Performance: REST APIs, WebSockets, JWT Auth, Google Drive API, QuickBooks API, Core Web Vitals

Testing & Tooling: Jest, React Testing Library, Playwright, Vite, Git, GitHub, PostgreSQL, Supabase, Jira, Agile / Scrum

CERTIFICATIONS

Anthropic Claude Developer Path · [Claude 101](#), Claude Code 101, Claude Cowork

2026

Namaste JavaScript & Namaste React · [namastedev.com](#)
